

Oklahoma Dealer Outreach Pack

1. Project Name

Oklahoma Dealer Outreach Pack

2. System Layer

External Expression

3. Authority Tier

Execution Level

4. Primary Purpose

To initiate and structure communication with 8 high-end bicycle retailers in Oklahoma, establishing Moots as the premier titanium alternative in a market defined by endurance riding, open terrain, and a growing gravel culture anchored in Oklahoma City.

5. Core Functions

Provides a standardized 3-touch email sequence for cold outreach to Oklahoma dealers. Delivers a concise, territory-specific pitch summarizing the Moots value proposition for the Oklahoma market. Summarizes the Oklahoma territory landscape based on current CRM data.

6. Inputs

- CRM data for 8 high-end Oklahoma bike shops (Oklahoma City, Tulsa, Norman).
- Moots brand guidelines and product line information.
- Territory vibe brief: urban grit meets open prairie — wind, distance, and light define the ride.

7. Outputs

- 3-Touch Email Sequence (Oklahoma-specific voice and event references).
- Dealer Pitch One-Pager.
- Oklahoma Territory Summary.

8. Upstream Dependencies

- Moots CRM (TX, OK, AR Dealer List).
- Moots Vibe Marketing Campaign — "The Forever Frame."
- Moots Sales Strategy.

9. Downstream Destinations

- Ian Zakrocki (sole territory representative, TX / AR / OK) — for execution.
- Oklahoma Bicycle Retailers — as recipients of the outreach.

10. Governance Constraints

Do not alter pricing or dealer margin structures. Do not promise exclusive territories without management approval. Do not deviate from the established Moots brand voice: short, masculine, understated, no spec language in vibe-facing content. All inquiries and orders route exclusively through Ian Zakrocki at ianzskrocki.com.

11. Contamination Risks

Over-promising inventory availability. Diluting the premium brand image with overly aggressive sales tactics. Allowing technical specification language to bleed into vibe-facing outreach copy.

12. Canonical Artifacts

- `Oklahoma_Dealer_Outreach_Pack.md` (This document)
- `Moots_Dealer_CRM_TX_OK_AR.xlsx` (Source CRM)
- `Moots_Vibe_Marketing_Campaign_The_Forever_Frame.pdf` (Doctrine layer)

13. Non-Promotable Content

Internal CRM notes and lead status tracking. Specific contact names and phone numbers (kept in CRM, not for public distribution). Dealer margin and pricing structures.

14. Current Status

Stable

15. Notes for System Integration

Ensure all outreach is logged in the `Moots_Dealer_CRM_TX_OK_AR.xlsx` tracker. Update Lead Status and Last Contacted fields after each touchpoint. Reference the Red Dirt Gravel Grinder (May 2026, Lake Hefner) and Flint Hills Gravel (Oct 2026) as territory-specific event anchors in outreach timing.

Oklahoma Territory Summary

Total Target Shops: 8

Key Markets: Oklahoma City (Midtown, Bricktown, NW OKC), Tulsa, Norman.

Territory Rep: Ian Zakrocki — ianzskrocki.com

Market Profile: Oklahoma's premium cycling market is smaller in shop count than Texas but carries strong per-shop potential. The OKC metro anchors the territory, with a cycling community shaped by long, exposed rides on flat-to-rolling terrain — Lake Hefner, the Flint Hills corridor, and the growing gravel scene around Red Dirt events. Shops currently carrying Specialized S-Works and Trek Project One represent the primary Moots opportunity: riders who already understand premium and are ready for the titanium conversation.

Key Events for Outreach Timing:

Event	Date	Location	Relevance
Red Dirt Gravel Grinder	May 2026	Lake Hefner, OKC	Flagship OKC gravel event — Routt RSL demo context
Moots Pop-Up: Elemental Coffee	Apr 26, 2026	Midtown OKC	First territory pop-up — dealer invite opportunity
Moots Pop-Up: Stonecloud Brewing	Jun 13, 2026	OKC	Post-ride taproom event
Flint Hills Gravel	Oct 2026	Emporia, KS (near OKC)	Classic Flint Hills terrain — campaign-aligned

Recommended Models for Oklahoma:

The **Routt RSL** is the primary Oklahoma model — suited to long, exposed rides where endurance and material permanence are felt over distance. The **Routt 45** serves the bikepacking and mixed-surface segment. The **Vamoots RSL** is a secondary conversation for road-focused Tulsa shops.

Priority Pop-Up Partners:

- **Elemental Coffee Roasters** (815 N Hudson Ave, OKC) — Midtown anchor, strong cycling community ties.
 - **Stonecloud Brewing Company** (1012 NW 1st St, OKC) — Historic building, short ride from downtown trails.

Moots Bicycle: Handbuilt in Steamboat Springs, Colorado

The Oklahoma Opportunity

Oklahoma's gravel and endurance riding scene is accelerating. The Red Dirt Gravel Grinder, the Flint Hills corridor, and the Lake Hefner trail network are producing a new generation of serious riders — people who have already bought their first premium carbon bike and are now asking a different question: *what do I ride for the next twenty years?*

That question is where Moots lives.

Why Partner with Moots in Oklahoma?

Moots sits alongside your existing premium lineup — Specialized S-Works, Trek Project One — as the titanium answer to carbon's expiration date. Your customers who already understand the value of a \$6,000 bike are the exact riders who are ready for the titanium conversation. Moots does not compete with your carbon floor. It completes it.

Every Moots frame is hand-welded in Steamboat Springs, Colorado. Not assembled. Not outsourced. The craftsmanship is visible and the story is real — which means your staff can sell it with conviction.

Key Models for the Oklahoma Market:

The **Routt RSL** is built for the long, exposed rides that define Oklahoma cycling — fast gravel, endurance events, conditions where the frame's character is felt over miles, not just on a test ride. The **Routt 45** serves the growing bikepacking and mixed-surface segment. Both carry the same hand-welded titanium construction and the same lifetime durability story.

The Dealer Program:

Ian Zakrocki is your direct contact for all Oklahoma dealer inquiries — pricing, demo fleet access, co-branded pop-up events, and territory support. Reach Ian at ianzskrocki.com.

3-Touch Email Sequence

Touch 1: Introduction & Value Proposition

Subject: A titanium option for your premium floor at [Shop Name]

Hi [Contact Name],

I've been following what you're building at [Shop Name] — your commitment to premium brands like [Specialized S-Works / Trek Project One] reflects exactly the kind of customer base that is ready for the next conversation.

I'm reaching out on behalf of Moots Bicycle. We hand-build titanium frames in Steamboat Springs, Colorado — every weld done by hand, one frame at a time. Moots is not a replacement for the carbon bikes on your floor. It is the answer to the question your best customers are already asking: *what do I ride for the next twenty years?*

The Routt RSL is our flagship gravel frame and the right fit for Oklahoma's long, exposed riding terrain. I would love to spend 10 minutes walking you through our dealer program and see if Moots makes sense alongside your current lineup.

Are you available for a brief call next week?

Best,

Ian Zakrocki

Moots Bicycle — TX / AR / OK Territory

Touch 2: Territory Anchor — Red Dirt & The Flint Hills (3–4 days later)

Subject: Oklahoma gravel is growing — here's where Moots fits

Hi [Contact Name],

Following up on my note from earlier this week. As the Red Dirt Gravel Grinder and the Flint Hills corridor continue to draw serious riders to Oklahoma, we are seeing a clear pattern: riders who have done one or two seasons on premium carbon are starting to ask about titanium.

The durability story resonates here. Oklahoma's terrain — wind, distance, gravel — is exactly the environment where the difference between a frame you replace in five years and a frame you ride for life becomes tangible.

I have attached a brief one-pager on our dealer program and the Routt RSL. I would value your perspective on whether there is a fit for your floor.

Do you have 10 minutes this week?

Best,

Ian Zakrocki

Touch 3: The Close / Long-Term Nurture (1 week later)

Subject: Closing the loop — Moots & [Shop Name]

Hi [Contact Name],

I know the shop floor keeps you moving, so I will keep this short. I have not heard back, which tells me the timing is not right — and that is completely understood.

We are looking to establish one strong dealer relationship in the Oklahoma City area, and based on your reputation, [Shop Name] was at the top of that list. If the conversation becomes relevant — whether that is next month or next season — I would welcome it.

In the meantime, we have a pop-up event at Elemental Coffee in Midtown OKC on April 26th. If you or any of your staff want to see the bikes in person, you are welcome to stop by.

Wishing you a strong season.

Ian Zakrocki
